Why invest in this fund

- A go anywhere, unconstrained total return bond fund.** Focus on return maximisation within a controlled risk framework.
- Broad opportunity set.** Combines dynamic asset allocation across sectors with an overlay to generate additional return across key macro drivers: interest rates, foreign exchange, and relative value.
- Experienced team.** A very experienced global bond team that also benefits from drawing upon the deep global resources of Invesco Fixed Income.

This marketing communication is for Professional investors and may also be used by financial intermediaries in the United States, as defined in the important information section. Investors should read the legal documents prior to investing.

Investment risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date. Changes in interest rates will result in fluctuations in the value of the Fund. The Fund uses derivatives (complex instruments) for investment purposes, which may result in the fund being significantly leveraged and may result in large fluctuations in the value of the Fund. The Fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the Fund. Investments in debt instruments which are of lower credit quality may result in large fluctuations in the value of the Fund. The fund may hold a large amount of Asset Backed Securities (ABS) (complex instruments) as well as other lower quality debt securities which may impact the liquidity of the fund under certain circumstances. The Fund may invest in distressed securities which carry a significant risk of capital loss. The Fund may invest in a dynamic way across assets/asset classes, which may result in periodic changes in the risk profile, underperformance and/or higher transaction costs. As a portion of the Fund may be exposed to less developed countries, you should be prepared to accept large fluctuations in the value of the Fund.

Glossary

ACR / Annual Compound Return: Compound returns represent the cumulative effect that gains and losses have on invested capital over time. Annual Compound Return is the annual rate of return that would be required for an investment to grow from its starting balance to its ending balance.

Benchmark index: A standard against which an investment fund or portfolio is measured to give an indication of relative performance.

Cash and cash equivalents (CCE): The liquid assets on a company's balance sheet. Cash includes currency and demand deposits, while cash equivalents are short-term, highly liquid investments. For accounting purposes, the cash and cash equivalent figure may include the notional cost of futures (a type of derivative). This notional amount will be negative when the Fund is buying futures and positive when the Fund is selling futures.

Collective investment schemes: Pooled investment funds that are managed by professional investment managers.

Commodities: Basic physical goods such as energy, metals, or agricultural products, that are interchangeable within their category and traded on global markets.

Contingent convertible bonds: A fixed income instrument that is convertible into stock if a pre-specified event occurs.

Credit Rating / Quality: The 'quality' of a bond is an indication of the bond issuer's financial strength and/or its ability to pay a bond's face value when it reaches maturity. Quality is rated using a AAA (higher quality) – CCC (lower quality) system.

Distribution frequency: How often dividends and/or interest generated by an investment product are disbursed to investors.

Duration: The weighted average time, in years, it could take for an investor to recoup a bond's value through future cash flows, such as interest and principal payment.

Effective maturity: The average time it takes for a bond's cash flows, including interest and principal payments, to be realised.

Financial derivatives: Financial contracts whose value depends on an underlying asset or benchmark.

Gross current yield: The current yield is the income received by an investor over the course of one year, divided by the current market price of the Fund, before any costs are deducted.

Gross redemption yield: A measurement of the annual return of the Fund, as a percentage of its share price, including expected annual cash payments and expected capital gain or loss if the bonds in the Fund are held to maturity.

High yield bond: Bonds rated lower than investment grade by the major credit ratings agencies.

Holdings: The contents of an investment portfolio or fund, including any products like equities, bonds or ETFs.

Investment grade / Investment Grade Bonds: Refers to bonds or issuers judged by credit rating agencies to have a low risk of default. Investment grade bonds are bonds rated BBB-/Baa3 or higher by major credit rating agencies, indicating relatively low default risk.

Leverage: The ratio of a company's debt to the value of its common stock.

Maturity: How far in the future the bond issuer is set to pay back everything they owe to bondholder.

Money market instruments: Financial instruments that are issued with a maturity of one year or less.

Volatility: The degree to which the price of a financial asset fluctuates over time, indicating how much and how quickly its value tends to rise or fall.

SFDR (Sustainable Finance Disclosure Regulation)

The Fund complies with Article 8 with respect to the EU's Sustainable Finance Disclosure Regulation*. As such, the Fund promotes, among other characteristics, environmental or social characteristics or a combination of those characteristics. In addition, the companies in which the Fund invests follow good governance practices. *Regulation (EU) 2019/2088 on sustainability – related disclosures in the financial services sector.

Exclusion Framework

The Fund embeds an exclusionary framework to specific activities based on UN Global Compact, severe governmental sanctions, revenue thresholds for certain activities linked to environmental and/or social criteria, as well as ensuring that companies follow good governance practices. The list of activities and their thresholds are listed below. **At Invesco we continuously monitor any applicable sanctions, including those imposed by the UN/US/EU and UK. These sanctions may preclude investments in the securities of various governments/regimes/entities and as such will be included in our compliance guidelines and workflows (designed to ensure compliance with such sanctions). The wording of international sanctions is something that we pay particular attention to as there are occasions where sanctions can exist in limited form, for example allowing investments in the secondary market. In addition to sanctions targeting entire countries, there are other thematic regimes, which may focus for example on human rights, cyber attacks, terrorist financing and corruption, which may apply to both individuals and/or entities/corporations.

Any investment decision should take into account all the characteristics of the Fund as described in the legal documents. For sustainability related aspects, please refer to: www.invesco.com/lu-manco/en/home.html.
